Technical University of Applied Sciences Würzburg-Schweinfurt

Faculties

- Architecture and Civil Engineering
- Applied Natural Sciences and Humanities
- Applied Social Sciences
- Electrical Engineering
- Visual Design
- Computer Science and Business Information Systems
- Plastics Engineering and Surveying
- Mechanical Engineering
- THWS Business School
- Business and Engineering

Profile

With about 9,000 students, the Technical University of Applied Sciences Würzburg-Schweinfurt, THWS in short, is one of the major technical universities of applied sciences in Bavaria. Its ten faculties offer more than 60 bachelor's and master's programmes. The diverse, future-oriented curriculum covers technology, business and economics, social sciences, computer science, design, and languages. THWS studies offer outstanding practice-orientation through internship semesters, research projects, and lab and seminar work. Students are thus optimally prepared for their careers. Cooperative study programmes and the TWIN programmes, which are unique in Germany, complete THWS' offers. In 2025, THWS established the Online Campus.

Educating students from numerous nations, THWS is internationally oriented. In addition to English-taught master's programmes, THWS has developed the so-called TWIN programmes that enable students to switch between the German- and the English-taught programme variant and obtain a TWIN certificate. The students benefit from the different linguistic and cultural competences. As part of the THWS Campus GATE, Arab students can start their studies of Hydrogen Technology or Social Work at German Jordanian University and complete them at THWS in Germany. The Online Campus also offers new perspectives for internationals (e.g. HZB).

Numerous labs, institutes, and technology transfer centers promote applied research. As per the research map of the German Rectors' Conference (HRK), THWS has chosen three research focuses: "Energy technology and energy efficiency", "Human and mobility", and "Digital and intelligent systems". The graduate schools "Sustainable and intelligent systems" (NISys) and "Changing living environments – perspectives from social and health sciences" (LiWa) enable students to complete doctorates exclusively at THWS in engineering or health and social sciences respectively.

The THWS Campus for Professional Development is a reliable partner for continuous practice-oriented advanced training. The wide range of programmes in the fields of digital, health and social affairs as well as business and leadership appeal to employees, companies, students, and prospective students from Germany, Europe and all over the world
